

# Wheel TAG

## Smart Wheel Connectivity Solution

With Smart Wheel Connectivity Solution, you can finally round out your monitoring to true 360°.

Wheel TAG is suitable for different vehicle types

Versatile sensors track a broad variety of parameters while driving in real time.

Access the data via deTAGtive Portal or API and use your own system with.

Intelligent Wheel TAG monitors air pressure, load, humidity, temperature and wheel position or vibration with 9 Axis Sensor.

OPENMATICS

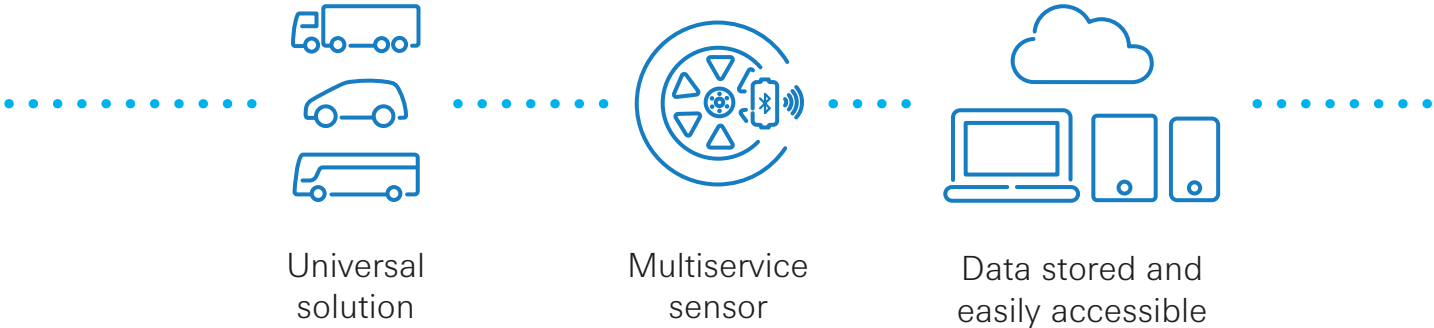

# Smart Wheel Connectivity Solution

The Smart Wheel Connectivity Solution, jointly developed by ZF OPENMATICS and Macion Wheels, offers the world's first fully integrated multiservice sensor set for your vehicle. No matter if you manage a fleet of passenger cars or a logistics company, it will help you optimize your vehicles' fuel consumption, working load and, most of all safety.

## Benefits

 <p>Prevents tire-related break downs and significant fuel consumption reduction</p>	 <p>World's first fully integrated wheel sensor</p>
 <p>Collection of data visualized on desktop, tablet or smartphone</p>	 <p>Suitable for different vehicle types (PC, CV, Buses and more)</p>
